NEW *VENDING SYSTEMS*

ON-SITE INVENTORY MANAGER

Eliminate the real costs of procurement with BGR Buylless™ Inventory Management

ON-SITE INVENTORY MANAGER

Your BGR Inventory Manager will regularly monitor inventory levels at your location, while keeping a local safety stock — letting you stay focused on what's important.

- NO ADDITIONAL EQUIPMENT
- REGULAR CONTACT WITH REP
- AUTOMATED OR ASSISTED ORDERING

NEW VENDING SYSTEMS

On-site vending systems provide efficient point-of-use access to increase your productivity. On-demand reports provide total traceability of used supplies.

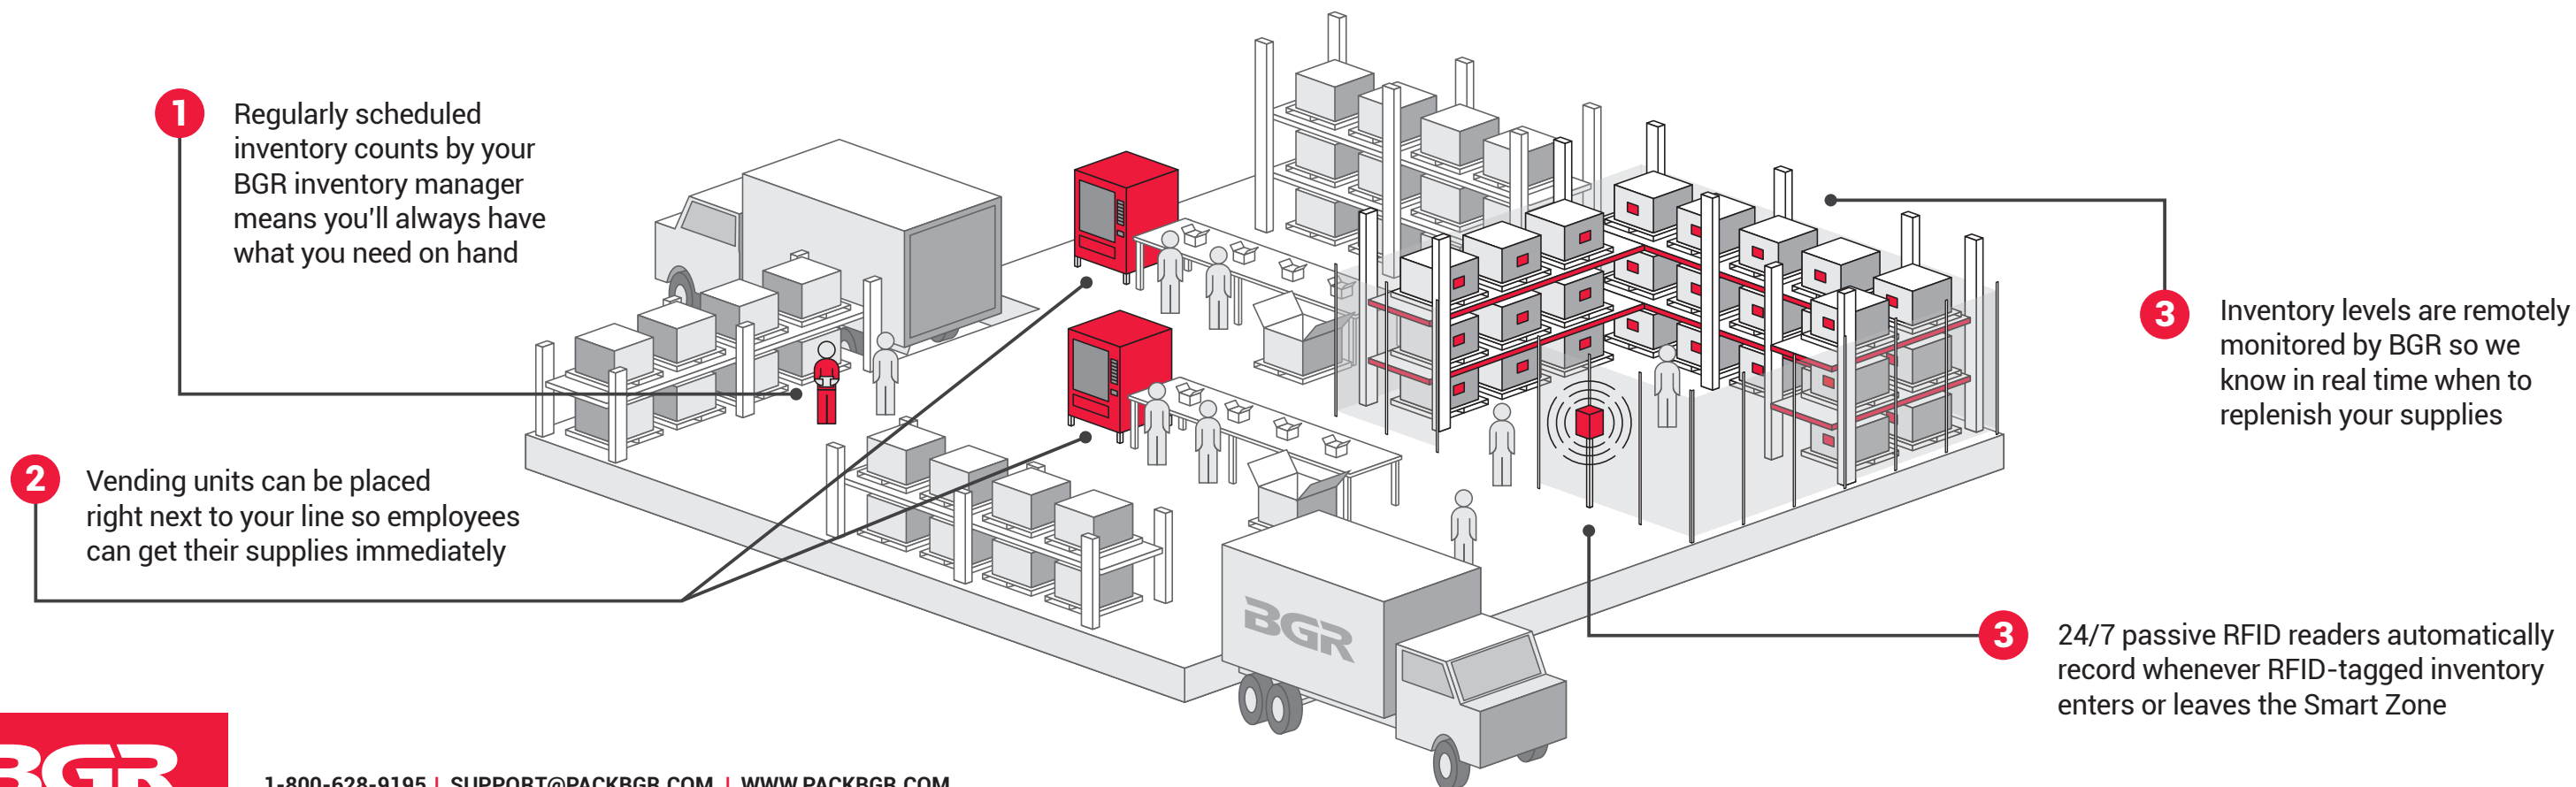

- PAY FOR WHAT YOU USE (CONSIGNMENT)
- AUTOMATED ORDERING
- REDUCED CONSUMPTION
- TOTAL TRACEABILITY

NEW RFID SMART ZONE

Our new RFID technology allows you to create a virtual BGR store within your warehouse. Authorized employees simply enter the enclosed RFID Smart Zone, pick up the supplies they need and return to work—eliminating purchase orders, manual logs and wasted time. Passive RFID readers detect and track RFID-tagged inventory as it is removed. This allows us to automatically log usage and manage supply levels for you. Now that's smart!

- PAY FOR WHAT YOU USE (CONSIGNMENT)
- AUTOMATED ORDERING
- REDUCED CONSUMPTION
- TOTAL TRACEABILITY
